

crow::nodeaddr_t

```
graph BT; A[crow::service_record] -.->|naddr| B[crow::nodeaddr_t];
```

The diagram illustrates a pointer relationship between two C++ types. At the bottom is a box labeled 'crow::service_record' with a light gray background. A dashed purple arrow points upwards from this box to a box labeled 'crow::nodeaddr_t' at the top. The arrow is labeled 'naddr' to its right.

naddr

crow::service_record
